Applied-mathematics student (near-senior standing) building end-to-end ML systems — from EEG signal pipelines to trading-signal models. Seeking a **Machine Learning / Data Science** internship.

EDUCATION

University of California, Los Angeles Expected June 2028 · Los Angeles, CA
B.S. Applied Mathematics (Specialization in Computing) · Minor in Statistics & Data Science
GPA: [X.XX] · Relevant coursework: Linear Algebra, Abstract/Advanced Linear Algebra, Differential Equations, Real Analysis, Discrete Structures, Honours Physics, Data Structures (in progress).

EXPERIENCE & RESEARCH

CruX Neuroscience — Developer 2025–Present · Los Angeles, CA

- Built an end-to-end ETL pipeline in Python ingesting live 16-channel EEG at [N] Hz to detect user focus states under cognitive load.
- Trained a custom deep model (PyTorch) generalizing across [N] subjects, reducing signal noise ~ [X] % versus a [baseline] baseline and reaching [X] % classification accuracy over [N] sessions.
- Exposed the model through a Python API integrated into user workflows; [N] pilot users self-reported [X] % productivity gains.

UCLA Startup Labs — Data Infrastructure for ML — Founder 2026–Present · Los Angeles, CA

- Founded a data-infrastructure project mapping qualitative social signals (images, memes, video) into a [d]-dimensional semantic space to feed trading and game-theory ML models.
- Built scraping + embedding pipelines processing ~ [N] items/day into vectors for downstream models.

UCLA Math + Code + Art — Researcher 2026–Present · Los Angeles, CA

- Developed Python tooling generating higher-dimensional Voronoi tessellations across visual art and music; built a deep model to measure style and transfer semantics across pieces.

International Baccalaureate — Fourier Research — Research Team Lead 2025–Present · Walnut, CA

- Authored a 30+ page paper on Fourier analysis and wave dynamics; ran an empirical study of the harmonic composition of optimal tones across instrument classes.
- Built a companion Python app with a live FFT pipeline for real-time audio signal processing.

Twin Digital Media — Founder 2023–2025 · Los Angeles, CA

- Founded and scaled a data-driven social-media marketing company; led a team of [N] and managed [N] client accounts. **Exited for six figures (2025).**

TECHNICAL SKILLS

ML / Data	PyTorch, NumPy, Pandas, ETL/data pipelines, feature engineering, regression, time-series analysis
Languages	Python, C++, C, SQL, R
Tools	Git, Linux, Jupyter, [Docker], [AWS/GCP]
Spoken	English, Vietnamese, Mandarin (fluent)

AWARDS

Math Department Award ('22, '23, '25) · International Scholar '25 · CIF Athletic Scholar Award '25
